

Mobilize your business.

Your business is one of a kind. Your next notebook PC should be, too. A notebook computer customized to your business needs and lifestyle helps you stay mobile, productive and responsive to your customers. Your Intel Product Dealer can understand your needs and build the ideal system that works the way you do. Intel Product Dealers are available to answer your questions and make recommendations and updates as your needs evolve.

The freedom to work when and where you want.

Business today no longer revolves around a desk. What is more, in a small business it is not uncommon to juggle multiple responsibilities – requiring that you stay connected to critical information while on the go. A versatile, lightweight notebook with wireless connectivity,* a long-lasting battery, and a wide range of optional features allows you to:

- Connect from almost anywhere – in and around the office, at home, from customer sites or even in transit.
- Increase productivity to get work done quickly and get on with your personal life.
- Reduce network wiring costs and give you increased flexibility in configuring your workspace as your needs change.

Keeping Bill mobile and productive.

Bill wears many hats. As a small business owner, Bill switches between marketing guru, sales rep, customer service agent, chief financial officer – you get the picture. Fortunately, Bill and his seven employees discovered the power of high-performance wireless notebooks. Now Bill works when and where he wants with amazing efficiency. He connects wirelessly at customer sites to share files and access account information. Between meetings, he pulls into a nearby coffee shop for Wi-Fi hotspot access and a cup of coffee. Excellent – his staff posted the new business pitch for his next meeting – it even includes video! Bill downloads the file, makes a quick edit, checks e-mail, reviews the payroll and he is off to dazzle another client. Good thing Starbucks has plenty of coffee.

“On average, end users say they are as much as 27 percent more productive on the wireless LAN versus the wired LAN.”

NOP World Technology,
“2003 Wireless LAN Benefits Study,” November 2003

Business without boundaries.

High-performance wireless notebooks open a whole new world of productivity and mobility to small and medium-size businesses. Intel® Centrino™ mobile technology is at the heart of a new generation of notebooks that enable:

- Breakthrough mobile performance*
- Integrated wireless LAN capability*
- Great battery life
- Thinner, lighter designs

Small Business is about flexibility and responsiveness.

If you want a notebook customized to your tastes – along with local service and support – it makes a lot of sense to buy through your Intel Product Dealer. That way, you have made-to-order features and convenient support.

Your Intel Product Dealer can help.

Look for a Product Dealer who can:

- Provide expert advice and will help you build the notebook of your choice.
- Offer a wide range of notebook models.
- Back up your notebook with local service and support.
- Be available to help you upgrade your notebook, add a wireless network to your home or understand a new application.

Ask your Intel Product Dealer about these notebook options.

- Case styles, screen types, pointing devices and keyboard sizes
- Wireless LAN options
- Graphics capabilities
- Hard drive sizes and types
- Internal memory and removable memory sticks
- Operating systems and application software

Get your notebook – your way. Today!

Get the notebook options – and level of service and support you need to stay mobile and productive. Ask your Intel Product Dealer about which options can give your growing business a competitive advantage.

+ Wireless connectivity and some features may require you to purchase additional software, services or external hardware. Availability of public wireless LAN access points limited and some hotspots may not support Linux* based Intel Centrino mobile technology systems. System performance measured by MobileMark* 2002. System performance, battery life, wireless performance and functionality will vary depending on your specific operating system, hardware and software configurations. See www.intel.com/products/centrino/more_info for more information.
